

# Documents for Jira

Stay organized. Raise your efficiency

## Product Name

Documents for Jira

## Available For

- Jira Cloud
- Jira Data Center
- Jira Server

## Product Features

- Folder hierarchy
- Documents in form of files with metadata (attributes like Title, Description, Author)
- Versions history, restore old versions
- Document search (in metadata)
- Configurable access permissions
- Link documents to Jira issues
- Lock / unlock document editing
- Dashboard gadgets
- Bulk documents upload

## Product Description

- A Document Management System (DMS) that allows storing your files in Jira in an easy, structured and secured way
- It adds an additional tab named "Documents" to the Jira projects where the project users can post documents related to that project, thus making them available to the other project team members

The screenshot displays the 'Documents for Jira' interface. On the left, a sidebar shows a folder hierarchy for '[Project Root] - ProjectDocs', including 'Templates', 'Version 1.0', and 'Version 2.0', each with sub-folders like 'Automation Scripts', 'Functional Requirements', 'Marketing', 'Project Management', 'Software Architecture', and 'Test Plans'. The main area shows a view of '[Project Root]' with 9 items in total, 1 selected. The selected item is a 'Class Diagram' (JPG). Other visible items include 'Templates' (folder), 'Version 1.0' (folder), 'Version 2.0' (folder), 'Architectural Guidelines' (PDF), 'Coding Guidelines' (DOCX), 'Functional Design Document' (DOCX), 'Product Architecture' (PDF), and 'Project Portal' (URL). On the right, a 'Class Diagram' is shown with a 'Details' section below it, indicating a 'Key: 23364'.

## Competitive Advantages

- All the documents and metadata are stored within the Jira instance
- Secure & reliable, Cloud Fortified
- ISO 27001 Certified Company
