

Facing issues while sorting Values(downward direction) for Project custom fields in “Project Specific” tab under Administration. Please look at the below snapshots.

1. Selected Application field from Custom field Dropdown.

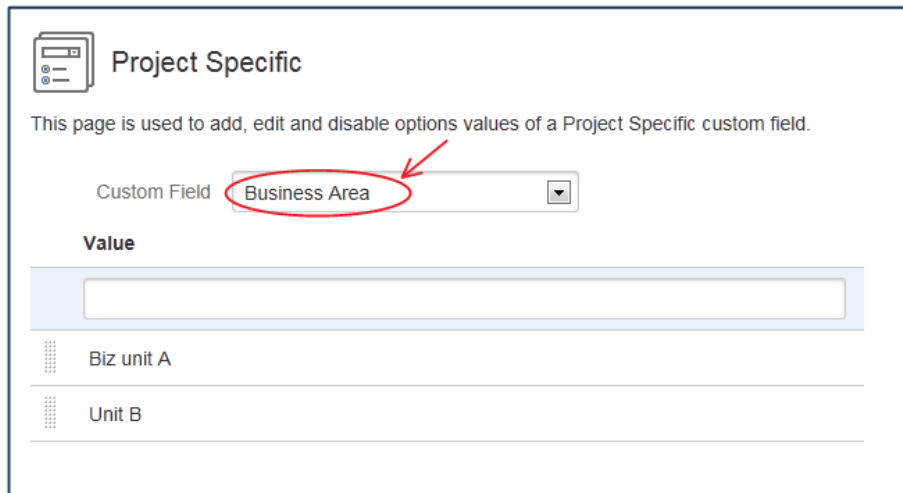

The screenshot shows the 'Project Specific' configuration page. At the top, there is a header 'Project Specific' and a sub-header 'This page is used to add, edit and disable options values of a Project Specific custom field.' Below this, there is a 'Custom Field' dropdown menu with 'Application' selected. A red circle highlights the 'Application' text, and a red arrow points to it from the right. Below the dropdown is a 'Value' input field. Underneath, there is a list of applications: Jira, Confluence, Fisheye/Crucible, Perforce, Bamboo, and Stash. The 'Bamboo' application is currently selected and highlighted with a blue background.

2.Placed fisheye/Crucible just below Perforce(Previously it was above Perforce which you can find in the above screenshot)

The screenshot shows the 'Project Specific' configuration page with the application list sorted. The 'Custom Field' dropdown is still set to 'Application'. The 'Value' input field is empty. The list of applications is: Jira, Confluence, Perforce, Fisheye/Crucible, Bamboo, and Stash. A red circle highlights 'Fisheye/Crucible', and a red arrow points to it from the left, indicating its new position below Perforce.

3. Selected Business Area custom field to check whether the sorting of Application field is updated.

**Project Specific**

This page is used to add, edit and disable options values of a Project Specific custom field.

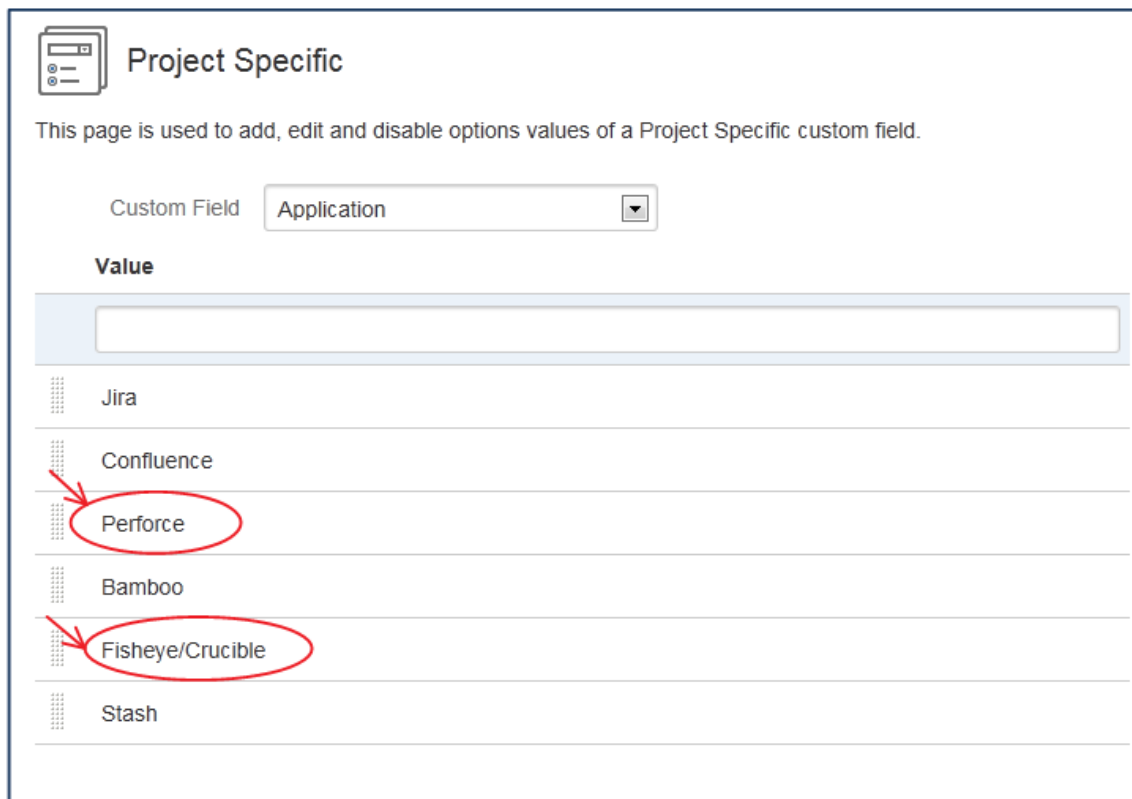

Custom Field **Business Area**

**Value**

- Biz unit A
- Unit B

4. Finally changed the custom field to application to check whether the fields were sorted.

**DEFECT:** Fisheye/Crucible value is moved two steps down and is showing after Bamboo value. Instead, it should show under Performce value.

**Project Specific**

This page is used to add, edit and disable options values of a Project Specific custom field.

Custom Field **Application**

**Value**

- Jira
- Confluence
- Perforce**
- Bamboo
- Fisheye/Crucible**
- Stash
