v1.0

**L^AT_EX support files for Softmaker
ViolinScript available at
<http://www.freefont.de>**

January 28, 2012

Package author:
Josef Kleber

This package offers L^AT_EX support files for the Softmaker ViolinScript font available at www.freefont.de in January 2007.

These support files were created with the `installfont` bash script, which is available in CTAN.

Attention

This package does **not** include the fonts (license restriction). They are or were available for free download at www.freefont.de, as well as part of some font collections of [Softmaker](#).

1 ViolinScript (January 2007)

1.1 Package options

The font style file offers the following options:

1.1.1 scaled

You can use the option `scaled` for scaling the font to better match with other fonts, e.g. `\usepackage-[scaled=1.03,leading=1.05]{iceberg}`.

1.1.2 leading

For some fonts it might be necessary to increase the leading between lines for a better optical impression, where 1.0 means 100%.

1.2 The Font

First of all, you have to get the font. Download it for free at www.freefont.de or get it from Softmaker. Copy the Postscript Type1 font ViolinScript.pfb to your local TEX tree:

TEXMF:/fonts/type1/softmakerfreefont/ViolinScript/

Family	Series	Shape(s)	Example of Typeface	Supported Encodings
6vs	m	n	<i>ViolinScript</i>	OT1, T1, TS1
6vs	m	sl	<i>ViolinScript</i>	OT1, T1, TS1
6vs	m	sc	<i>V90L9M5CR9PT</i>	OT1, T1, TS1

1.3 Installation

The following steps will show you the installation in the case of MiKTeX. For another TEX distribution please take a look in its documentation.

- get [violinscript.tds.zip](#)
- extract it in the main directory of your local TEX tree
- update the 'FileNameDataBase (FMDb)' in MiKTeX Settings or with `initexmf -u` on the command line
- include the map file
 - run `initexmf --edit-config-file updmap`
 - add `Map violinscript.map` in the opening editor
 - save the file and close the editor
 - run `initexmf --mkmaps`

¹ for system-wide installations you have to add the `--admin` switch

1.4 Usage

If you want to typeset your complete document with the font ViolinScript simply add `\usepackage{violinscript}` to your preamble. If not, simply add another font package after `\usepackage{violinscript}`. You can switch to the font ViolinScript with the command `\FFViolinScript`, which is a shortcut for:

```
\fontfamily{6vs}\fontseries{m}\fontshape{n}\selectfont
```
